STUNTS & ABILITIES (DETAILED)

Savant
Special: requires SIM State Stunt or Apotheosis Augmentation. You hacked the mandated restrictions. Gain SINC Skill 1 (improve normally), one Savant Program, and a new Disadvantage Aspect reflecting side effects. At Milestones you may trade -1 from a Skill (not below 0) to remove that Aspect.

Skilled
Increase one non-Physical Skill by +1 (Pure may apply to a Physical Skill, but must replace this Stunt if ever resleeved or becomes a SIM). May be taken multiple times; no Skill may exceed 5 via this Stunt. At a Major Milestone, you may shift the +1 to a different Skill.

System Slip
As a SIM, you hide in networks. Gain +2 on Stealth vs Research contests to detect you on a host. Savant Programs directed at you have their execution difficulty increased by +2.

Drone-Jock
When you purchase this Stunt: (1) reduce the Cost of any drone you buy by -1; (2) each drone gets +1 to two of its Skills (chosen when purchased); (3) each drone you buy gains +1 Augmentation Point.

Specialized Program
Choose one Savant Program you know; gain +2 on attempts to execute that Program.

Puppeteer (Simple Action)
Possess a drone, experiencing its senses as if wearing it as sleeve

Eminent Domain (Simple Action)
Seize temporary control over computer-controlled environment systems
