STUNTS & ABILITIES (DETAILED)

Savant
Special: requires SIM State Stunt or Apotheosis Augmentation. You hacked the mandated restrictions. Gain SINC Skill 1 (improve normally), one Savant Program, and a new Disadvantage Aspect reflecting side effects. At Milestones you may trade -1 from a Skill (not below 0) to remove that Aspect.

Specialized Program
Choose one Savant Program you know; gain +2 on attempts to execute that Program.

Skilled
Increase one non-Physical Skill by +1 (Pure may apply to a Physical Skill, but must replace this Stunt if ever resleeved or becomes a SIM). May be taken multiple times; no Skill may exceed 5 via this Stunt. At a Major Milestone, you may shift the +1 to a different Skill.

Licensed
You have a license to acquire restricted equipment using Rep-Rating instead of Assets. Overuse may draw investigation; being caught can revoke the license (GM may allow replacing this Stunt at next Milestone).

Memory Hack (Extended Action)
Edit memories stored on target's mnemonic core

Access Memory (Simple Action)
Hack into a person's mnemonic core to retrieve stored data

AUGMENTATIONS (DETAILED)

Bio-Skin Sheath C
Natural skin-like covering for cybernetic limbs or sleeves.

Custom Built Aspect: Custom-Built Specialization
Sleeve customized for specific task or environment.

Data Jack and Storage C
Wired interface to external systems and storage.

Hidden Weapon System C
Built-in hidden weapon mount (blade or firearm).

Retinal Implant C Aspect: Retinal Implant
Nanocybernetic eye with zoom and enhanced low-light detail.

SIM-Cell Module C
Mindset partition and second mnemonic core to host another ego.

Smuggler's Compartment C
Hidden insulated compartment for small item concealment.
